

Rules for fishing in Lågen – Practice non-stationary fishing

To give everyone an equal opportunity to fish in the best possible manner, the following guidelines should be followed:

- Start fishing at the upper end of the fishing zones or where it is natural to start.
- Always start above a fisherman already stationed in the river if this is possible. If there already is a fisherman at the position where you have chosen to fish, wait until he has fished downstream away before you go in the river above him.
- For each new cast, move downstream at least 2 meter.
- At stands where non-stationary fishing is impossible, the fisherman should vacate the stand after 30 minutes maximum.
- Each fisherman is obliged to keep up with rules and regulations.
